Subject: Architects Foundation & Partners announce second RFQ for D&H Consortium

DHLG members—

Today, the Architects Foundation, in partnership with AIA and ACSA, released an RFQ to identify 4-6 university-led teams that will form the second cohort of the Consortium. You may read the press release here: <http://www.aia.org/press/releases/AIAB107102>.

Per the recommendations of this committee and existing members of the Consortium, we seek established teams who, in collaboration with multi-disciplinary partners, are prepared to tackle the translation and application of research for the public, policy makers, and both design and health practitioners. To that end, we have strengthened the language and requirements for applicants in the full RFQ, now available on AIA.org: <http://www.aia.org/practicing/AIAB104553>. **Please share this opportunity broadly with your network.**

Because of the changes and the nature of the opportunity, we have also scheduled an informational webinar for September 18 at 3pm Eastern. You are encouraged to join this webinar. You may register here: <https://attendee.gotowebinar.com/register/4869245886405193474>.

Thanks in advance,
Matt
