

Network Attached Storage (NAS) Server for IDG

Synology DS415+ - \$620.00

- Simple, expandable storage.
- A full-blown server that can handle offsite backup, local backup, web hosting, VPN, and much more.
- Sports the iSCSI protocol, letting us treat the shared file storage as if it were attached directly to our machines. Faster access times, better file management.
- Brand has a reputation for solid performance.
- There's a well-done interface for setting things up and managing changes, excellent help files. [Demo here](#).

Samsung 840 Evo-Series 1TB SSD - \$400.00

- Very fast drive with plenty of storage for working files will greatly improve performance of work-shared Revit models.
- Super reliable: Samsung SSDs consistently score high ratings.

Hitachi Deskstar NAS 4TB HDD - \$190.00

- [Highly reliable](#) traditional hard drive.
- For daily backup of our files AND workstations.

APC SMT750 UPS - \$260.00

- Critical for data and hardware protection.
- 20min – 30min of battery power.

TOTAL COST: \$1,470.00
