Beyond the Basics Series

As part of the Academy's multi-channel, on-line approach, these sessions provide emerging and experienced professionals with convenient and economical opportunities to develop their chosen area of interest.

This session is intended to expose healthcare-competent members of healthcare-centric practices timely information on evidence-based design research.

Compliance Statement

“AIA Knowledge” is a Registered Provider with The American Institute of Architects Continuing Education Systems (AIA/CES). Credit(s) earned on completion of this program will be reported to AIA/CES for AIA members. Certificates of Completion for both AIA members and non-AIA members are available upon special request.

This program is registered with AIA/CES for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the AIA of any material of construction or any method or manner of handling, using, distributing, or dealing in any material or product.

Questions?

Submit a question to the moderator via the chat box.

Content-related questions will be answered during the Q&A portion, at the end of the presentation, as time allows. Any questions not answered during Q&A, will be answered and posted online within two (2) weeks.

Tech support questions will be answered by AIA staff promptly.

Healthcare Design Awards Case Studies

Case Study Library

Isabella Rosse

Actions

03-24-2017 17:23

The Academy of Architecture for Health proudly announces six (6) new case study additions to the Case Study Library with more to follow over the coming months. These case studies are from the 2013, 2014 and 2015 AIA/AAH Healthcare Design Award recipients, and we hope to have all of them added by the end of 2018 or sooner.

We started our 2016 efforts with the 2013 UCLA Outpatient Surgery and Cancer Center Project as our Pilot Case Study Project and followed that up in the spring of 2017 with additional case studies utilizing six of the seven 2016 AIA/AAH Healthcare Design Award winners as the first phase of a CASE STUDY formatting project with the goal of "bridging the gap" between research and practice.

Architects, Designers and Planners usually conduct literature reviews, site and facilities tours, and occasionally put together informal "case studies" for their clients and teams to review before beginning [illegible]. The AIA/AAH Research Initiatives Committee proposed a [illegible] and [illegible] format for the type of formal case studies with the idea that, [illegible] will improve the quality of the Case Studies and eventually lead to more detailed POE Studies by researchers.
