## Letter from the 2012 HRC Chair

Jean Carroon, FAIA, 2012 Chair AIA Historic Resources Committee

Dear Historic Resources Committee Members:

Fall is a time when many of us gather at one conference or another, renewing friendships and sharing knowledge. The Advisory Group was well represented at the joint conference of the Association for Preservation Technology and the Preservation Trades Network in Charleston, South Carolina – Peyton Hall, Ashley Wilson, Jonathan Spodek and I were present. For those attending the National Preservation Conference in Spokane, Washington in early November, please join us at the AIA Historic Resources Committee Luncheon on Friday, November 2. The event is #AFR406 and is organized, as it has been for years, by Jamie Malanaphy, so we know it will be both fun and interesting.

The 12<sup>th</sup> International Congress on the Deterioration and Conservation of Stone will be at Columbia University October 22<sup>nd</sup> through October 26<sup>th</sup>. The HRC is co-sponsoring this event with the Historic Preservation Education Foundation and we are providing the Continuing Education Units thanks to the hard work of Deborah Slaton who put together the educational review materials.

The AIA Committee on Design's Fall Conference is being held in cooperation with the HRC in Seville, Spain in November. There are still a few places open. If you are going, please consider blogging for the rest of the HRC and we'll share this on the AIAKnowledgeNet.

The international student competition, Preservation as Provocation, for 2012-13 has launched and a special shout out is due to AG Member, Ashley Wilson who has put untold hours into every detail, not the least of which is funding. This international competition is administered by the Association of Collegiate Schools of Architecture (ACSA) and the HRC. Sponsorship comes in part from the National Center for Technology and Preservation and Technology Training (NCPTT) and Clemson University Graduate Program in Historic Preservation. The competition challenges students to rethink Castle Pinckney, an abandoned early nineteenth century fort situated on a coastal island within the Charleston, South Carolina harbor.

Four exceptional people share a formal position on the HRC Advisory Group with me and we are supported by an even broader group who make up the sub-committees. There are many activities underway. Of particular note is a continuing outreach and conversation with the National Park Service as they proceed with *A Call to Action: Preparing for a Second Century of Stewardship and Engagement* in anticipation of the NPS 100th anniversary in 2016. A new Cultural Resources Programs website and forum was recently created in support of A Call to Action. The new website at <http://ncptt.nps.gov/call-to-action/> has information on several long-term initiatives -- some of particular interest to HRC -- as well as a greater opportunity to provide feedback. NPS actions include updating guidelines related to documentation, traditional cultural properties, and the treatment of historic properties and cultural landscapes; revising the professional standards and the NPS thematic framework; and reviewing research, technical assistance, and publications. This is a wonderful opportunity for all of us to participate.

You'll be hearing news in the upcoming months about the exciting programs that AG Member Jonathan Spodek is putting together for the 2013 AIA Conference in Denver. You won't want to miss the pre-conference session on energy retrofits. Wendy Hillis will be presenting on the Richard Morris Hunt Fellowship Program, which is incentive for all of us to become fluent in French. The Getty Conservation Institute has launched the Conserving Modern Architecture Initiative and AG Member Peyton Hall is in conversation with them about events the AIA HRC can be part of.

I want to thank the following HRC and subcommittee members:

## Peterson Prize Winners

A student competition of measured drawings, the Charles E. Peterson Prize is presented jointly by the Historic American Buildings Survey (HABS) of the National Park Service, the Athenaeum of Philadelphia, and the American Institute of Architects. The annual competition, currently in its 30th year, honors Charles E. Peterson, FAIA (1906-2004), founder of the HABS program, and is intended to heighten awareness about historic buildings in the United States and to augment the HABS collection of measured drawings at the Library of Congress. In addition to generating over 5,800 sheets of drawings for the collection to date, the competition presents awards totaling \$7,500 to the winning student teams. Drawings must be of a building that has not been recorded by HABS through measured drawings, or be an addendum to existing set of HABS drawings that makes a substantial contribution to the understanding of the significance of the building.

## Holland Prize Winners

The 2012 Leicester B. Holland Prize was selected by a jury held on August 8, 2012. The Holland Prize, a competition open to both students and professionals, recognizes the best single-sheet measured drawing of an historic building, site, or structure prepared by an individual(s) to HABS/HAER/HALS standards and guidelines. The prize honors Leicester B. Holland (1882-1952), FAIA, who in the 1930s was chairman of the AIA's Committee on Historic Buildings, head of the Fine Arts Division of the Library of Congress and first curator of the HABS collection, a co-founder of the HABS program, and the first chair of the HABS Advisory Board. It is administered by the Heritage Documentation Programs and is supported by the Paul Rudolph Trust, *Architectural Record*, a magazine of the American Institute of Architects, and the [Center for Architecture, Design & Engineering](#) in the Library of Congress.

The prize is intended to increase awareness, knowledge, and appreciation of historic sites, structures, and landscapes throughout the United States while adding to the permanent HABS, HAER and HALS collection at the Library of Congress, and to encourage the submission of drawings among professionals and students. By requiring only a single sheet, the competition challenges the delineator to capture the essence of the site through the presentation of key features that reflect its historic and its architectural, landscape architectural, or engineering significance.

## 2012 Richard Morris Hunt Fellowship Reunion

Wendy Hillis, AIA

The American Architectural Foundation and French Heritage Society hosted the Richard Morris Hunt Fellows Reunion May 25-30, 2012, in Toulouse, France. Seventeen alumni Fellows took part in a five-day event featuring walking tours of Toulouse, Carcassone, and Albi as well as discussions about their latest projects and hot topics in historic preservation and the urban environment.

*Richard Morris Hunt fellows and friends in Toulouse. Front Row: Kyle Brooks, Bob Hotes, Leopold Lombard, Mary Brush, Michele le Menestrel Ullrich, Liz Blazeovich, Aldo Cossutta, and Jean-Christophe Simon. Second Row: Liz Newman, Yves Patrick Deflandre, Vanessa Fernandez, Ruth Todd, Tina Roach, Standing: Ambassador Jose-Maria Ullrich, John Robbins, Sabina Fabris, Diego Rodriguez, Bonita Mueller, Jérôme Francou, Pascal Filâtre, Alan Schwartzman, Isabelle Michard, Pierre-Antoine Gatier, and Phillippe Mercier. Photo Credit: Kyle Brooks.*

Bonita Mueller (RMHF 1992) kicked-off the conference with a public presentation about the National Park Service's stewardship of historic sites, sponsored by the U.S. General Counsel in Toulouse. Round-table discussions were also featured, with topics ranging from how to preserve and rehabilitate historic monuments for contemporary use, accessibility within historic sites, and appropriate infill design in historic contexts. Liz Newman (RMHF 1999) and Yves Deflandre (RMHF 1997) concluded the reunion with presentations highlighting global preservation projects focused on community development at the *Ecole Nationale Supérieure d'Architecture*, Paris-Belleville.

The Hunt Fellowship is named for Richard Morris Hunt, the first American architect to study at the *École des Beaux-Arts* in Paris. Its purpose is to introduce experienced preservation architects in the United States and France to innovative preservation practice and techniques in each other's countries. There have been twenty three French and American laureates since 1990.

## Educators Convene to Share Ideas on Teaching the Next Generation in Historic Preservation

How the next generation of historic preservationists is educated has profound implications across the preservation world, especially given that effective education means a greater likelihood of qualified professionals. But while the U.S. is home to an array of quality preservation programs at colleges and universities, there has been surprisingly little conversation among educators about how best to teach those who will comprise the preservation workforce in the future.

On Sept. 8 and 9, more than 75 educators from not just the U.S. – but from the United Kingdom, the Netherlands, Australia, Brazil, Mexico and more – convened in Providence, R.I., to discuss best practices at a conference titled “Preservation Education: Sharing Best Practices and Finding Common Ground.” The conference was hosted by the School of Architecture, Art and Historic Preservation at Roger Williams University with support from Clemson University, the College of Charleston, the University of Florida and the University of Georgia.

After two days of discussion and debate, a set of key ideas emerged. Jeremy C. Wells, assistant professor of historic preservation at Roger Williams and the conference chair, says the ideas focused on everything from embracing technology and encouraging innovation to linking the built and natural environments, integrating with other disciplines and building partnerships with K-12 education, real estate professionals and more.

Wells also noted that the attendees agreed that without a more concise definition of what the “discipline” of historic preservation is, there would continue to be difficulty in defining what students should be accountable for as far as skill sets and knowledge are concerned.

“We need better understanding and consensus around our view of the world,” he said. “There is even some discomfort with the term *historic preservation* itself. Does *preservation* imply stasis – that things never change? Would *conservation* more accurately represent our approach? We need to envision a future in which we build consensus on these questions, among preservation practitioners and educators alike.”

## Quinn Evans Architects

*Jennifer Henriksen, AIA*

After collaborating for ten years at the former Preservation Urban Design, Inc., Mike Quinn and David Evans joined together in 1984 to form Quinn Evans Architects. QEA began as a two-person firm focusing on high quality architecture that respects and preserves the historical significance of each building and site. Over the past 28 years the firm has grown to over 60 professionals, added sustainable design as a goal for every project, embraced new technology for building investigation and documentation, and never lost sight of the original goals set out by Mike and David.

As historic preservation architects, the firm's approach to historic preservation does not focus solely on individual building elements or materials, but considers the building, its users, and the community in which it resides. With each project we evaluate the history of the building or site, how the building or site contributes today, and what will be its impact on the future. This holistic approach to our work means the staff at Quinn Evans Architects includes individuals who specialize in materials conservation, research, building code, design, interiors, community development, landscapes, sustainability, and more. We bring our collective expertise and shared knowledge of historic structures and both historic and current building practices together to craft excellent design that allows historic buildings to tell their story while being viable for the future.

We recognize that an individual building becomes an asset to a community through the ways the public interacts with the building. We strive to incorporate positive interactions between the people of the community and the character-defining features that make each building unique. Our current projects are all examples of that goal. At the Ann Arbor Municipal Center, a public green space ties together the existing city building and the new addition. In Detroit, we revitalized formerly abandoned historic buildings while incorporating sustainable design in projects such as the Odd Fellows Hall in Southwest Detroit and Newberry Hall and 71 E. Garfield in Midtown. The latter building also houses our new Detroit studio, demonstrating our commitment to being part of the new Detroit. The Accident Fund Insurance Co. Headquarters, located in Lansing, Michigan, repurposed a long vacant power station, and redeveloping the adjacent Riverwalk revived the public urban fabric of Lansing.

At Quinn Evans Architects we are dedicated to our work as advocates for historic buildings, promoters of sustainable preservation, and developers of community pride in the built environment.

### AIA CEU's Available at the 2012 National Preservation Conference

At the end of October, the National Trust for Historic Preservation will be in Spokane, WA for the National Preservation Conference. The program this year attempts to go "Beyond Boundaries" and look at preservation from all angles, including the following three general sessions taking place at the start of each day of sessions.

You Say Wilderness, I Say Preservation! Good vs. Good on public Lands and Beyond

Beyond LEED: A Candid Conversation about Green Building Standards and Preservation

But that's not all. For professionals in the fields of planning, architecture, landscape architecture, and green building will find plenty of opportunities at the National Preservation Conference to fulfill their Continuing Education credits (CEUs). From tours of modernist architecture in Spokane to educational sessions on greening historic district guidelines and tax credits, this year's conference offers plenty of options for busy professionals to learn more about preservation and related fields.

The American Institute of Architects (AIA)--has approved 45 courses and tours for continuing education credits. Approved 90-minute education sessions offer 1.5 credits and approved tours also offer 1 unit for each instructional hour (minus breaks and meals). In advance of the conference final program, we've listed all the conference sessions and tours that have been approved for continuing education credits and their respective accrediting organizations in [this chart](#). If you have any questions email [conference@nthp.org](mailto:conference@nthp.org).

# BSA Lecture series: Matthew Bronski on Design and construction durability

from **BSA** PLUS 1 year ago

2009 National Endowment for the Arts Rome Prize in Historic Preservation and Conservation winner, Matthew Bronski, followed the footsteps of Roman architect/engineer/planner/master builder Marcus Vitruvius Pollio. He directly observed more than two dozen buildings in Italy, deriving lessons on long term durability and preservation.

Complete your AIA KnowledgeNet profile by **December 12, 2012** at 12:00 pm Eastern Time and [submit the entry form via email](#) to be entered to win one **16GB iPad2 with Wi-Fi**. [Learn how the points add up to complete your profile on the FAQ page.](#)

[Submit Entry Form #1](#)

Completing your profile is as easy as 1, 2, 3!

1. You start out with up to 30 points, of the 100 points you need to complete your profile, based on the information the AIA already has in the database.
2. First, get a jump start on completing your profile by directly importing your LinkedIn profile. Look for the "Update your information from LinkedIn®" link on [your profile page](#).
  - The import includes your photo; your biography; your job and school histories; your honors and awards. (That's worth up to 55 points!)
  - Don't have a LinkedIn Profile? Just enter the information directly into your profile.
3. Next, list your professional specialties, affiliations, and interests. (That's worth up to 30 points!)

### Additional Details
