Academy of
Architecture for Health
an AIA Knowledge Community

Healthcare Essentials/NextGen Committee

As part of the Academy's multi-channel, on-line approach, these sessions provide millennial members starting out in healthcare-centric practices exposure to healthcare design fundamentals and a refresher course for experienced healthcare architects and planners.

Compliance Statement

“AIA Knowledge” is a Registered Provider with The American Institute of Architects Continuing Education Systems (AIA/CES). Credit(s) earned on completion of this program will be reported to AIA/CES for AIA members. Certificates of Completion for both AIA members and non-AIA members are available upon special request.

This program is registered with AIA/CES for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the AIA of any material of construction or any method or manner of handling, using, distributing, or dealing in any material or product.

AIA/CES Reporting Details

Your CES credits from this event will be automatically reported given your engaged attendance during the entire event today.

If you are watching in a group setting and have multiple people in the room, please make sure the person who registered for the course, includes your name and AIA member number in their post webinar survey.

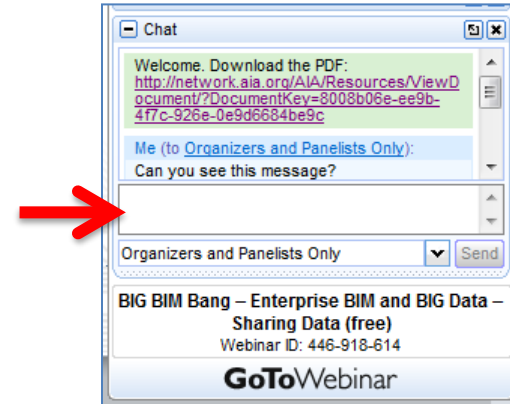

We encourage all registrants to fill out the post webinar survey. Your feedback is important and informs us of future webinar topics to better meet listener needs.

Questions?

Submit a question to the moderator via the chat box.

Content-related questions will be answered during the Q&A portion, at the end of the presentation, as time allows. Any questions not answered during Q&A, will be answered and posted online within two (2) weeks.

Tech support questions will be answered by AIA staff promptly.

Onsite expertise:	<div>None</div>
Cost:	<div>\$</div>

EFFORT VS. IMPACT

REALISM & ECOLOGICAL VALIDITY

Spectrum of Applications

VIRTUAL REALISM

The extent to which graphics in simulated environments replicate real world graphical expectations.

BEHAVIORAL REALISM

The extent to which an observer responds to a virtual environment in the same way that they would respond to a physical environment.

CONTEXTUAL REALISM

User and environmental characteristics that may modify the ecological validity of a simulated environment (e.g. sociodemographic factors, cultural backgrounds, past experiences, presence/absence of built/natural features)

Low

Medium

High

FIDELITY

ADDRESSING THE RIGHT QUESTION

What are you trying to understand?

- What type of information do I need?
- Is a control group necessary?
- How many stakeholders do I need?
- How many environments will users experience? What level of fidelity do I need?
- What type of stakeholder engagement do I need? What is the final deliverable?

COMMON VR INDUSTRY APPLICATIONS

- Conceptual design
- Presentation VR
- Marketing VR
- Simulations

CONCEPTUAL DESIGN

Diagrammatic VR models

BENEFITS

- Quick modeling
- Assess adjacencies
- Minimal investments

LIMITATIONS

- Low graphic quality
- Low immersion

SOFTWARE APPLICATIONS

- Enscape
- IrisVR
- Revizto

PRESENTATION VR

Photorealistic VR models

BENEFITS

- Evaluate finishes & equipment
- Validate design decisions
- Executive leadership & end – user signoff

LIMITATIONS

- Significant investment to develop
- Most software pipelines do not support backward compatibility or linked models

SOFTWARE APPLICATIONS

- Unreal Engine
- Unity
- Vray

VR rendering

Final photography

VR rendering

Final photograph

MARKETING VR

- VR models can double as the base for renderings and flythroughs
- Expertise in VR indicates to clients that a firm is forward-thinking and tech-savvy
- Firms without VR are placed at a disadvantage competing with firms that have it
- Many firms claim to provide VR as a service but there is a wide range of VR capabilities in the marketplace

VR SIMULATION

Expand upon the out-of-the-box functionality

- Requires a program that allows customization (Unreal Engine or Unity)

Generally, requires custom scripting and interfaces

- Must have an expert on your team for this to be cost-effective

Often existing digital modeling pipelines do not support clean workflows

- Limitations are established by pipeline and workflow

Simulations may result in duplicate work due to single-direction pipeline

- Lack of backward compatibility prevents live edit or prevents changes made in the VR model from being pushed back to the documentation models (Revit)

SCENARIO BASED VR MOCKUPS

How many?

How many **days** of the week will the **imaging** center be open?

How many **hours** will the **imaging center** be open?

How many **days** of the week will the **imaging** center be open?

How many **hours** will the **imaging center** be open?

How many **MRI scans** will be scheduled per day?

What is the average duration of an **MRI scan**?

How long will it take to **turnover** an **MRI** room?

How many **CT scans** will be scheduled per day?

What is the average duration of a **CT scan**?

How long will it take to **turnover** an **CT** room?

How many **exam room visits** will you see per day?

What is the average duration of an **exam** room visit?

How long will it take to **turnover** an **exam room** between each visit?

hide trash and sharps

Profile

- Working professional that does not want cancer treatment to get in the way of the job he loves
- Early in the chemo process
- Takes the early morning appointments in hopes to get to work afterwards
- Selects semi-private to stay connected and to have privacy if he wants to work

Journey

1. Did all lab work and Dr appointment day before
2. Parked in garage on level 02
3. Did not wait, came straight back
4. Selected semi-private room closest to nourishment to be able to grab coffee more easily

Checklist

- 1. Semi-private infusion bay
- Medical Gas: A.O.V.S (1) mounted at 2'-0"
- Casework - half open shelving for personal storage, half closed cabinet w/ adjustable shelving
- Full height cabinet w/ adjustable shelving
- USB/pwr outlets above casework
- TV mounted above casework
- Furdow w/ light above casework/TV
- Coat/Purse hooks (2)
- Guest Chair
- Side table
- Infusion Chair
- IV stand & pump
- Shelf/ledge at 2'-6" with USB/pwr outlets above
- Sharps - wall mounted v floor v built-in?

TUCK N TRASH (BIG & CHEMO), WALL MOUNTED SHARPS
REGULAR TRASH IN CHARTING ALC

MATTHEW MR. SOCIAL PATIENT

Male, 32
Chemo appointment at
8:00 AM

Profile

- Always wants open infusion - waiting on his chemo buddy to come so they can chat about the latest headlines
- Likes that he gets to see all the action and does not mind the cute nurse either
- Usually cheerful, but glad he can tuck himself back into the I/2 wall if he wants to take a nap

Journey

1. Liberated to the appointment and dropped off at the cancer center door
2. Went straight to blood draw
3. Reception to check in
4. Selected an open infusion with an open spot next to it for his buddy

Checklist

- 1. Open infusion Bay
- Medical Gas: A.O.V.S (1) mounted at 2'-0"
- Casework - half open shelving for personal storage, half closed cabinet w/ adjustable shelving
- USB/pwr outlets above casework
- No TV in open infusion bays
- Coat/Purse hooks (2)
- Guest Chair
- Side table
- Infusion Chair
- IV stand & pump
- High point of wall behind infusion chair at 4'-0" sloping down to 1'-6" on corridor side
- Does this provide sufficient privacy should the need arise?
- Sharps - wall mounted v floor cart v built-in?

CASE STUDY – ADVENT HEALTH

Hybrid Operating Room

- VRPlatform: Unreal Engine
- Fidelity: High
- Method: Head Mounted Display
- Design Phase: Design Development

CASE STUDY – SCENARIO BASED VR MOCKUPS

- VRPlatform: Yulio (white box)
- Fidelity: Low
- Method: Screen Sharing
- Design Phase: Schematic Design/ Design Development

CASE STUDY - SPATIAL RELATIONSHIPS & CRITICAL ADJACENCIES

- Platform: Yulio (with Revit textures)
- Fidelity: Medium
- Method: Screen Sharing
- Design Phase: Pre-design/ Schematic Design

02 Support
Corridor

Navicent Childrens Hospital NNICU...

01 NNICU Unit Entry

CASE STUDY – COMPARING DESIGN ALTERNATIVES

- Platform: Enscape (with interactive features)
- Fidelity: High
- Method: Individual HMD
- Design Phase: Schematic Design

WHERE VR EXCELS

CONCEPTUAL DESIGN

- Validate design decisions, compare options, get a real sense of scale, mockup spaces that are otherwise too large/ expensive to mockup with minimal effort

PRESENTATION DESIGN

- Foster's end-user & executive engagement, compare finish/ fixture/ equipment configurations, validate decisions made throughout the design process

SIMULATION

- Simulations & multi-user collaboration give clients & designers the opportunity to experience & discuss the space, make (limited) changes in real-time, & work through scenarios relevant to the final functionality of the space

LIMITATIONS & COMPLICATIONS

- All interactions have a learning curve
 - First time users often do not take advantage of VR functions
 - Walking through the digital model
- Poorly optimized models can run poorly or cause simulation sickness in participants
- VR is not the right tool for all situations
 - Some users resist VR
 - Uncomfortable/ motion sickness/ hesitation to put on the headset
- VR has a significant development time/ cost associated with it
 - Firms must be selective & efficient in implementing VR

BENEFITS

Reduced project
schedules

Reduction in
change orders

Improved
communication

Value of
Consensus

Transition
Planning

Scalability for
Communication

FUTURE OF VR

- *Complications due to COVID 19*
- *Emerging technologies*
 - *Eye-tracking*
 - *Hand-tracking*
 - *AR/ VRglasses*
 - *Wireless HMDs*
 - *Interactivity*
- *VR/ ARconvergence*

U40 List: Healthcare Design's Best Under 40 [Edit](#) [Delete](#)

The U40 List is nomination oriented recognition to celebrate individuals making a significant contribution to the advancement of health facilities design. Each year up to two individuals will be selected to have their names added to the distinguished U40 List. The nominees will receive a formal letter to affirm the Summer 1 nomination.
