WE203: ARCHITECTURE ABROAD: An International Practice Workshop

If you practice globally - or plan to expand your services abroad - you need a working knowledge of international practice. Success hinges on anticipating the challenges, risks, opportunities, and rewards that different countries present. That's where this full-day workshop comes in.

In *Architecture Abroad*, expert practitioners and senior government trade officials will offer their insights to help you:

- Seek quality work in global markets and obtain region-specific information, including comparative economic trends and analyses.
- Prepare for potential changes once work is secured.
- Anticipate the impact of political systems, regulations, codes, delivery methods, and cultural/environmental factors.
- Use practice aids and tools to craft project execution strategies.

PRESENTERS AND DISCUSSION LEADERS

George Miller, FAIA / Workshop Host

Chair, AIA International Practice Committee Advisory Group
Past President, the American Institute of Architects
Partner, Pei Cobb Freed & Partners

Justin Cratty, AIA, LEED AP
