

**VOTE FOR THE AIA RESOLUTION FOR URGENT AND SUSTAINED CLIMATE ACTION
Providing a framework for action on statements and recommendations by the AIA Board
and Committees**

THREE ACTIONS:

1. Declare an urgent climate imperative for carbon reduction
2. Transform the day-to-day practice of architects to achieve a zero-carbon, equitable, resilient and healthy built environment
3. Leverage support of our peers, clients, policy makers, and the public at large.

**TO BE A VOTING DELEGATE AT THE BUSINESS MEETING ON WEDNESDAY JUNE 5TH
YOU MUST:**

1. **Be accredited** by your chapter in advance or on site before NOON at the Convention Center
2. **You must attend the start of the Business Meeting to register your presence** via your keypad. If you show up later your vote *will not count*. Hall N1
3. You must attend the session from 3:45-5:45PM where the resolution will be discussed.

FULL TEXT BELOW:

Resolution 19-11 [Confirm Resolution Number]

Title

Resolution for Urgent and Sustained Climate Action

Sponsors

Betsy del Monte, FAIA, and fifty members of the Institute

Intent

To provide a framework for the AIA to prioritize and support urgent climate action to exponentially accelerate the “decarbonization” of buildings, the building sector, and the built environment.

Text of Resolution

WHEREAS, in 2017 the AIA Board of Directors issued *Where We Stand: Climate Change* (<https://www.aia.org/resources/77541-where-we-stand-climate-change>) and the *AIA Commentary on Climate Change Mitigation* (http://content.aia.org/sites/default/files/2017-04/AIA-Commentary_climate-change-mitigation.pdf) which state the AIA's position on the science of climate change, the substantial greenhouse gas emissions from buildings and cities, and the vital role architects must play in combatting climate change.

WHEREAS, in 2018 the AIA Board of Directors adopted the revised the *AIA Code of Ethics and Professional Conduct* (http://content.aia.org/sites/default/files/2018-09/2018_Code_of_Ethics_0.pdf) fully updating *Canon VI, Obligations to the Environment* including:

- *Ethical Standard 6.5: Climate Change. Members should incorporate adaptation strategies with their clients to anticipate extreme weather events and minimize adverse effects on the environment, economy, and public health.*
- *Rule 6.501. Members shall consider with their clients the environmental effects of their project decisions.*

WHEREAS, for many years the AIA and its members have invested their resources to be engaged in and informed about climate change by participating in the highest-level national and international conferences and summits including: in 2015, the United Nations Conference of the Parties 21 (COP21) in Paris; in 2016, the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) in Quito, Ecuador; and in 2018, the Global Climate Action Summit in San Francisco.

WHEREAS, in 2018 AIA President Carl Elefante, FAIA, constituted the Blue Ribbon Panel for Codes and Standards which states in its draft report: “...today we observe a rapidly changing world that is not properly reflected in what it means to protect ‘health, safety, and welfare.’ We have observed the devastating effects of climate change throughout the world, growing social inequity, and human health crises that demand the definition of ‘HSW’ now focus on and include the growing bodies of knowledge in resilience, equitable design, and advanced building performance.” (*Disruption, Evolution and Change*, AIA Blue Ribbon Panel for Codes and Standards, Report, to be released June 2019)

WHEREAS, in 2019 AIA President William J. Bates, FAIA, informed the Sustainability Leadership Group that *“...leaders from AIA’s Board of Directors and executive team described their intention to focus Institute resources and influence for deeper impact on a specific topic. Dubbed the Big Move, that proposal has been honed to focus on economically viable climate action through buildings’ operational and embodied carbon.”*

WHEREAS, in 2019 AIA President William J. Bates FAIA charged the Sustainability Leadership Group to *“serve as and work in conjunction with other Board level committees for the AIA to maximize impact as the Institute shifts into a greater leadership role mitigating and adapting to a changing climate.”*

WHEREAS, in accordance with President Bates’ charge, the Sustainability Leadership Group, composed of leaders of the seven AIA committees focused on issues of healthy, sustainable, and resilient design, met at AIA Headquarters in February and April 2019 and recommended three actions to the AIA Board of Directors for sustaining the health, safety, and welfare of human life on our planet:

1. *Declare an urgent climate imperative for carbon reduction.*
2. *Transform the day-to-day practice of architects to achieve a zero-carbon, equitable, resilient and healthy built environment by adopting the AIA Framework for Design Excellence. (The AIA Committee on the Environment (COTE) Top Ten Measures (<https://www.aia.org/resources/6077668-the-cote-top-ten-toolkit>)).*
3. *Align and utilize our external messaging to leverage support of our peers, clients, policy makers, and the public at large.*

NOW, THEREFORE, BE IT RESOLVED, that commencing in 2019 and continuing until zero-net carbon practice is the accepted standard of its members, the AIA prioritize and support urgent climate action as a health, safety, and welfare issue, to exponentially accelerate the “decarbonization” of buildings, the building sector, and the built environment.

BE IT FURTHER RESOLVED, that the AIA engage its full membership; the clients and communities members serve; federal, state and local policy makers and governing bodies; other professional organizations and affiliates, and the public on climate action through a multi-year strategy for education, practice, advocacy, and outreach.

BE IT FURTHER RESOLVED, that following the example of the *AIA Guides for Equitable Practice*, the AIA prepare *Guidelines for Ethical Practice on Climate Action* to delineate practices for complying with *Canon VI, Obligations to the Environment* in the *AIA Code of Ethics and Professional Conduct*.

BE IT FURTHER RESOLVED, that the AIA revise its *Public Policies and Position Statements* to support urgent climate action.

BE IT FURTHER RESOLVED, that the AIA adopt and implement the recommendations of the Blue Ribbon Panel on Codes and Standards and the Sustainability Leadership Group.
