RESOURCES

Climate Action Business Playbook

The Climate Action Business Playbook is a resource for building an architectural practice that embraces climate change mitigation and adaptation.

 <p>INTRODUCTION</p> <p>Introduction: Understanding the current landscape</p> <p>Because almost 40% of U.S. greenhouse gases can be</p>	 <p>FIRM</p> <p>Transform leadership & practice</p> <p>Architects are collaborative leaders and rely on a team to deliver projects that are healthy.</p>	 <p>FIRM</p> <p>Embody climate action in studio operations</p> <p>Sustainable and resilient operations provide continuity during shocks and stresses. In a</p>
 <p>FIRM</p> <p>Communicate key principles</p> <p>Investors increasingly care about climate risks but are often</p>	 <p>PORTFOLIO</p> <p>Goal setting: Aim high</p> <p>The social, economic, and environmental impact of an individual project can be</p>	 <p>PORTFOLIO</p> <p>Measure progress & successes</p> <p>Project delivery is the lifeblood of any practice. One critical action is</p>

RESOURCES

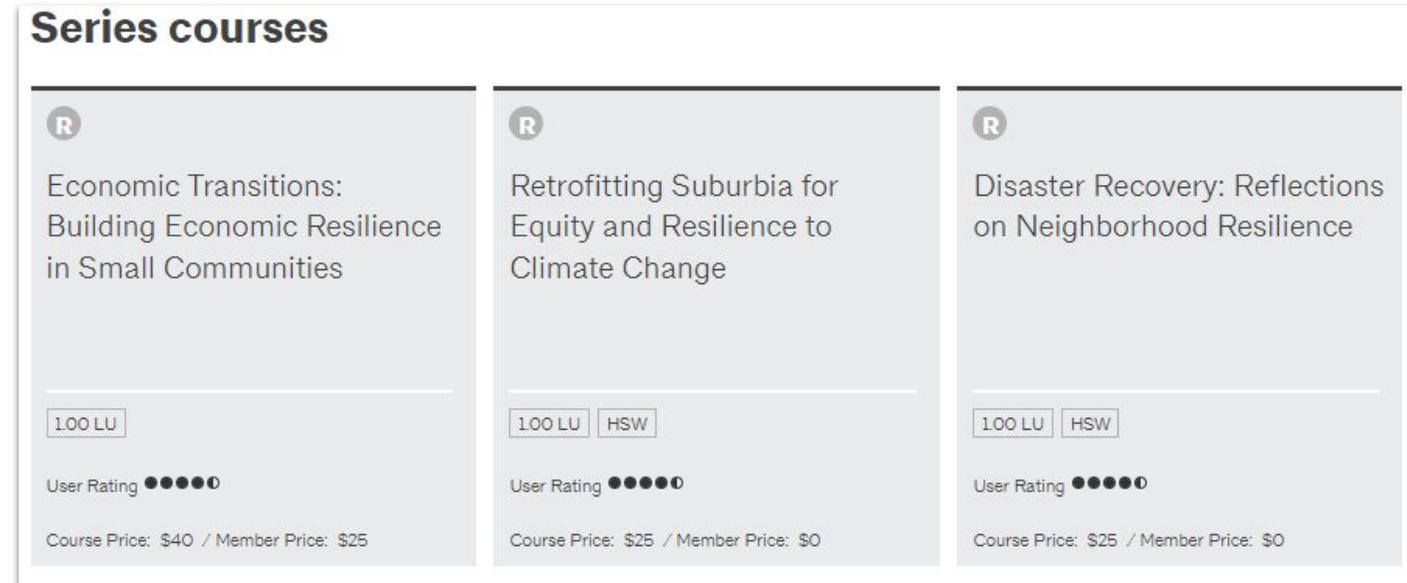

This resource shares how architects can bring about racially just and equitable outcomes for all members of the communities they serve. Although there are myriad challenges that can hinder the depth of impact, providing designers frameworks for actionable tools, tactics, and strategies offer a means to understand their extent of agency. With these tools in hand, designers can more sensitively drive equity in practice and in the communities in which they work and live.

RESOURCES

AIA Communities by Design (CxD)

Throughout this series, participants will gain real world insights into the innovative approaches that have been applied across the country to address community challenges. Speakers will highlight how architects and civic leaders, etc. can leverage tools and strategies to ease the burden of these transitions.

The screenshot displays a section titled "Series courses" with three course cards. Each card includes a registration icon (R), course title, credit information (LU and HSW), user rating (5 stars), and pricing (Course Price and Member Price).

Course Title	Registration Icon	LU	HSW	User Rating	Course Price	Member Price
Economic Transitions: Building Economic Resilience in Small Communities	R	1.00		5 stars	\$40	\$25
Retrofitting Suburbia for Equity and Resilience to Climate Change	R	1.00	1.00	5 stars	\$25	\$0
Disaster Recovery: Reflections on Neighborhood Resilience	R	1.00	1.00	5 stars	\$25	\$0

Goals & Platform

- Inclusivity, Equality & Outreach
- Legislation & Code
- Wellbeing through Sustainability

Upcoming Programs

- Environmental Equity: MASS Design Group
- Material Specification Toolbox
- Client Panel, Sustainable Standards
- BERDO vs NYC Law 97
- Urban Forest / Living Shorelines
- Networking Event with WiD

Buffalo/WNY COTE 2022-23

Launched March 2022

- Build up membership
- Identify priorities: education, resources, & focus on issues unique to Great Lakes / WNY region
- Quarterly happy hours
- Collaborated with UB School of Architecture on *Beyond Sustainability* Book Launch & Panel Discussion, April
- Connected with AIA CNY & Rochester COTEs
- Applied for AIA grant for small chapters / climate programming

Planning for 2023

- Green building tours & presentations
- AIA+2030 Online Series: starting in February
- Framework for Design Excellence -> Design Awards
- Sustainability Symposium, Fall 2023
- Regionally-focused events with other COTEs, e.g. NYS Climate Leadership & Community Protection Act

Chair: **Roxanne Button**, AIA, CCS,

ARCHITECTURE : ⇔ RESEARCH ∩ ENVIRONMENT ∩ DESIGN

2021

Problem Statement :

How can AIA Colorado COTE, better support Colorado AIA membership in:

- Participants understanding and general education of sustainability issues
- Improve access to resources that empower members in their design of sustainable projects
- Help remove barriers commonly encountered in the execution of sustainable projects
- Energize members to commit to making every project meet sustainability performance goals

Key issues explored in survey :

- Define personal idea(s) of “sustainability”
- Assess % of work that is driven by client requests for sustainability versus standard practice
- Identify barriers for studios in designing and constructing a “sustainable” project
- Identify expected barriers in firms in meeting the 2030 Challenge

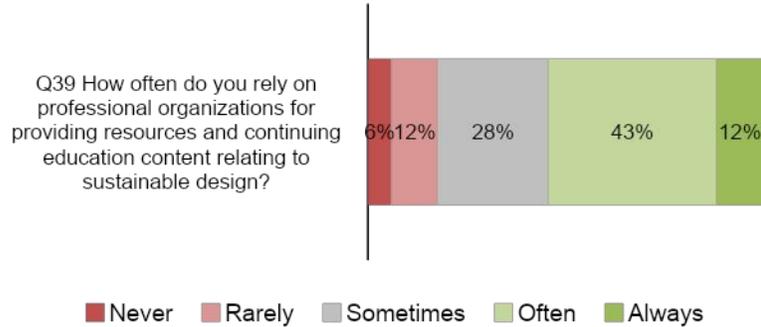

We encourage you to take our survey!

<https://www.surveymonkey.com/r/P3793N8>

2022

(A few) Key Findings

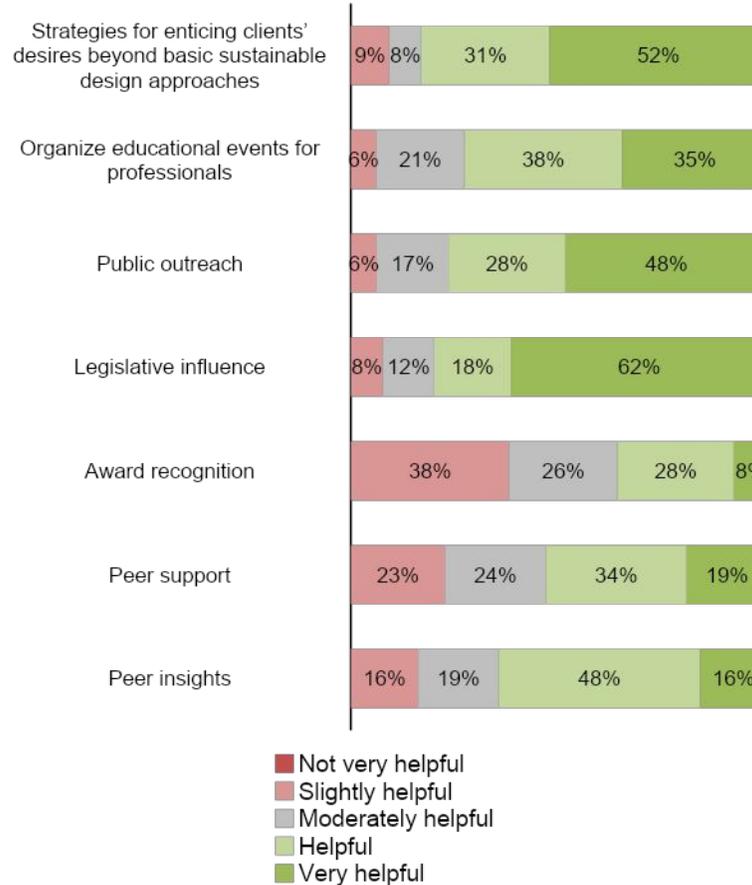

Reliance on Professional Organizations For Sustainable Design Resources

Effectiveness of Professional Organizations to Meet individual Sustainable Design Learning Needs

How can AIA help you succeed with sustainability in ways that other organizations cannot?

2022 Goals

- **Advise and consult**
 - Continue to advise and consult with State, City, and other government entities on initiatives advancing sustainability in the built environment
- **Education Seminar(s)**
 - Topics Include :
 - 2030 Commitment implementation strategies
 - Net Zero Energy design
 - Integrating sustainable design into existing architecture workflows
- Encouraging engagement in the 2030 Commitment
 - Develop resource webpage for CO architects aspiring to meet the 2030 Challenge
- Sustainability survey results report

We encourage you to take our survey!

<https://www.surveymonkey.com/r/P3793N8>

Columbus COTE

COTE's Goal

To positively impact built environment climate initiatives in the Columbus area through programming, education, and advocacy. COTE's goal in the near future is to help the City shape and carry out the City's Climate Action Plan, which aligns to AIA's local and national goals.

2022 Accomplishments

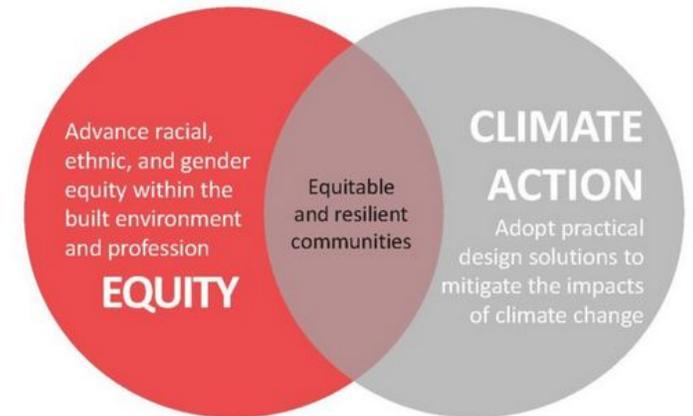

- Developed relationship with City of Columbus Office of Sustainability
- Joined 3 City of Columbus Climate Action Plan Working Groups
- Provided educational programs: Tech Trade Show, CAP Panel, Energy Modeling

2023 Looking Ahead

- Build committee membership
- Continue to engage in Columbus Climate Action Plan Working Groups
- Provide tools and support to engage members as 2030 Signatories, including:
- Educational Programming: Energy Modeling, 2030 Signatory Tools

AIA Columbus Vision:

Through the Power of Design, we can drive positive change that fosters equitable and resilient communities.

Wast(ED): Living with Trash

Nov 08, 2022

Please join the AIANY Committee on the Environment, Pratt's Graduate Architecture and Urban Design (GAUD) program, NJIT's Hillier College of Architecture and Design, and Skidmore, Owings & Merrill (SOM) for Wast(ED): Living with Trash, a virtual and in-person event that will examine issues of how we address waste in an urban context. The first of two panel discussions, From Dumps to Density, will examine living nearby and on top of waste. The second panel, From Recycling to Upcycling, will discuss innovative ways to reuse waste materials and buildings in urban contexts.

The discussions will bring together esteemed architects and thinkers who will offer provocative and counterintuitive perspectives on climate change and its impacts. Work from NJIT and Pratt GAUD students examining these topics will be presented. This event is the third of a series of collaborations between Pratt's GAUD, NJIT's Hillier College of Architecture and Design, and AIA New York on climate change. A reception will be held following the event.

Our Consolidated Subcommittees

- *Embodied Carbon Network*
- *Policy*
- *Materials - Health & Circularity*
- *Design for Ecology*
- *2030 Working Group*
- *Social Equity & Resilience*

September 2022 - First in person COTE gathering since start of the pandemic. We are planning on a mix of in person and virtual meetings in 2023.

Chapter Updates?

Chapter Updates?

- Our biggest accomplishment: infiltrating the design awards committee by adding a COTE liaison, meaning that we were able to adopt the Common App for the COTE award, and that every design excellence entrant was asked to include narrative responses to the Framework for design Excellence.
- In 2023, we look forward to increased activity and committee member investment through our newly formed subcommittees: awards, education, programs and codes/policy

2022 Leadership

David Hincer, AIA,
LEED AP BD+C

Co-Chair
Danielle Fleischmann, AIA,
WELL AP

2022 Accomplishments

Design Awards

Participated as Jurors for the AIA Tampa Bay Sustainable Design Awards (shout out to Sherman Aronson, David Hincher, Danielle Fleischmann, Sophia Lee, and Rob Fleming)

2030 Commitment

2030 Working Group sessions and workshops on SMART sustainable design goals, Embodied Carbon, Operational Carbon, and Adaptive Reuse.

Zero Waste

Finalizing and implementing the Zero Waste guide for in person events at the Center for Architecture.

Refocusing research topics that can impact our day to day work and personal lives.

Environmental Justice

3 part series focused on Urban Heat Island and the impacts of UHI, green gentrification, and environmental justice in Philadelphia. This was so impactful, all three event speakers are invited back to present at the Forum on Architecture and Design.

Policy + Advocacy

Spring into Action on Electrification in Philadelphia. Tackling the need for improving and stabilizing the grid, our infrastructure, our homes, and our daily lives.

SPRING INTO ACTION!

EDAC

2022 Accomplishments

Tall/Mass Timber

AIA and the Green Building Alliance (GBA) collaborated to produce a four-part seminar series exploring mass timber construction in Pennsylvania. The series runs from October 5 to November 16 and covers four parts:

- System Applications
- Carbon Footprint
- Project Planning + PA Building Codes
- Finale + Happy Hour

Pittsburgh Architecture Week

AIA Pittsburgh held its first ever Pittsburgh Architecture Week at the end of September. Capitalizing on multiple architecture-related events happening around the same time, PAW brought architecture to the public through lectures and building tours. AIA PGH again partnered with GBA on a tour of an adaptive reuse project: the Museum Lab of the Children's Museum of Pittsburgh.

A slide titled "MASS TIMBER SERIES" with a teal background. The text reads: "A collaborative 4-part presentation that will explore the opportunities, challenges, and potential of Mass Timber construction in Pennsylvania." Below this is the heading "THE SPEAKERS" and four speaker profiles, each with a small portrait photo and their name and title.

MASS TIMBER SERIES
A collaborative 4-part presentation that will explore the opportunities, challenges, and potential of Mass Timber construction in Pennsylvania.

THE SPEAKERS

 <p>MOMO SUN Regional Director WoodWorks</p>	 <p>JULIA WATTICK Associate BranchPattern</p>
 <p>KIRSTEN CLEMENS Associate Bohlin Cywinski Jackson</p>	 <p>AMAL MAHROUKI Director Legislative Affairs AIA Pennsylvania</p>

2023 Goals

Materials

Launch a series of seminars on materiality with a focus on:

- Building material reuse as a vital component to Pittsburgh's economy and sustainability goals.
- Explore how supply chain issues affected resourcing on a local/regional/national scale.
- Explore new emerging materials, trends, and their applications - hemp, mycelium, 3D-printing, low-embodied carbon materials, reclaimed materials
- Circular economy and Cradle-2-Cradle certifications.
- Coordinate with Carnegie Mellon University's lecture series on Extractivism.

SPRING 2023: EXTRACTIVISM

The spring series shines a light on the politics and geographies of the materials architects use. Where do they come from and how are they extracted? How do we negotiate the human and energy cost of their production? What roles might architecture play in reshaping material economies?

City of Pittsburgh

1. Collaborate with the Advocacy Committee on outreach to City of Pittsburgh officials on issues around sustainability, building performance, decarbonization, and resilience.
2. A meeting has been scheduled with the deputy Mayor of Pittsburgh for later this year. Intention is for this to be an ongoing relationship.

AIA Oregon Architecture Awards

November 18, 2022

Submission Materials

1. PROJECT IDENTIFICATION PAGE

All project identification is to be entered in the form fields on the first tab in the submission portal.

2. ANONYMOUS NARRATIVE

The project narrative is to be entered in the second tab in the submission portal.

- In 500 words or less. Summarize the project, its physical context, the ideas behind it, the challenges it presented and how they were investigated and resolved. Place emphasis on the elements of design achievement defined in the Judging Criteria. Avoid elaboration of features already made clear by photographs and drawings. Include information about project intentions, including program requirements, cost data, and the distinguishing aspects of their resolution.
- Framework for Design Excellence: Within the word limit identified above, for built projects, describe how your project addresses the measures "Design for Integration" and "Design for Discovery", and two other measures as determined by the selecting firm. For unbuilt projects, address "Design for Integration" and three other measures. Read about the Framework for Design Excellence here: <https://www.aia.org/resources/6077668-framework-for-design-excellence>
- For preservation/restoration projects provide the jury with sufficient information to differentiate between the original architects' work and the newly altered, preserved, or restored work.
- DO NOT identify the architect, designer, or firm in any way. This is to be provided to the jury anonymously for review.
- Please include a summarized narrative as prompted in the submission portal. Max 120 words. This will be used for display and promotional use as necessary.

4. CLIMATE IMPACT CALCULATOR (Required only for 2030 Award eligibility)

The completed 2022 AIA Oregon Building Climate Impact Calculator Excel file shall be attached in the third tab of the submission portal. This is only required for consideration for the 2030 Award. Please use the following file naming convention: ProjectName_co2calc.xls.

See here for calculator instructions:

<https://aiaoregon.box.com/s/1cxr922nk7a6axjin2up25l0nikonvu2>

Download the calculator file at: <https://aiaoregon.box.com/s/bu8gdrsu600zppoe6ond63p4frfthjc3>

AIAO COTE Green Champion Summit - October 10, 2022
Held during Portland's **SUSTAINABLE BUILDING WEEK**

2022 COTE GREEN CHAMPION SUMMIT - DEMOCRATIZING DECARBONIZATION

The annual AIAO COTE Green Champion Summit brings to you sustainability leaders from around the region and country. This year we gather to discuss how our already-strong efforts to reduce both carbon and greenhouse gases can be bolstered by new legislation, technologies and practices which could steepen our approach to end climate change.

Following the address, a panel of local experts on policy, technology and implementation will share with you the good news about recent legislation and incentives to help move the needle on Carbon sequestration and GHG reduction for architects and clients. We will then shift the conversation to consider our collective responsibility as professionals in the design and building community to take action. As Keynote this year, we will hear from Jeff Tuft, AIA of ArchitecturalNexus. He will discuss the culture of ArchitecturalNexus, a firm that makes a priority of regenerative and sustainable projects. He will show, through several project case studies, the methods, materials and client-centered feedback tools they use to create increasingly resilient and excellent architectural projects.

AIA Oregon Climate Impact Calculator

Step 1: Instructions & General Information

KEY

USER INPUTS ARE IN WHITE CELLS	INSTRUCTIONS ARE IN GREEN CELLS	CALCULATIONS ARE IN ORANGE CELLS
--------------------------------	---------------------------------	----------------------------------

Instructions

Welcome to the AIA Portland Climate Impact Calculator. The purpose of this tool is to make calculation of the CO₂ emissions related to your project's energy consumption as simple and straightforward as possible. At the same time, this process has been set up to transparently provide educational information and resources to help raise awareness of the CO₂ calculation resources that are available to designers for use on their projects.

This is a 4-step process:

- 1- Enter General Project Information
- 2- Enter Project Energy Usage Information
- 3- Select Appropriate Emission Factor
- 4- Review Results!

General Information

Project Name:	1121 Building
Project Address:	123 Hypothetical Lane Portland, OR 97208
Built or Unbuilt:	Built
Total Square Footage (GSF):	88,000
Total Construction Cost (\$):	\$1,000,000
Design Completion Date (or Permit Date):	11/2017

— Select from drop down list

Project Summary:

This sample project has no unique details and has been created for demonstration purposes only. Please include a short description of your project in this space (on Tab 1, Instructions & General Info) to serve as a summary of the project that will appear on Exhibit C. This is where you can describe specific energy-related design goals and attributes of your project.

Updated July 2019. This calculator was originally created for the Portland Architecture Awards by Joshua Hatch (Brightworks Sustainability), and slightly modified by Chris Meek (UW Integrated Design Lab) to adapt it to the AIA Seattle Honor Awards. Special thanks to: John Jennings, Greg Flinders, Michael Gilbride, Alan Mahio, and Jason

AIA San Antonio - COTE

2022 Review

Committee On
The Environment

an AIA member group

This is an education session that will highlight various ways to best integrate sustainability tools and resources into your practice through the lens of the AIA Framework for Design Excellence. Short case study presentations from our panelists will be followed by a panel discussion around the opportunities and challenges of integrating the Framework for Design Excellence.

Light refreshments will be provided.

DATE AND TIME:
Monday August 15th,
from 5:30 to 7:00PM.

LOCATION:
AIA SAN ANTONIO
1344 South Flores, Suite 102
San Antonio, Texas 78204

INTEGRATING BIOMIMICRY AND BIOPHILIA IN DESIGN

This workshop will provide an introduction to biomimicry and biophilia and how to integrate them into your design practice. The workshop will demonstrate how to look to natural models for inspiration, abstract biological findings into design mechanisms, and develop design solutions inspired by nature. Confluence Park will be featured where the petals of the park and rainwater collection were inspired by local flowers and water collection systems. You will also receive the *iSites: Nature Journaling for Biomimicry* book which is included in the cost of the event and will be used during the workshop. Light refreshment will be provided.

DATE AND TIME:
Saturday, October 1st
9am-12pm
(3-hour workshop)

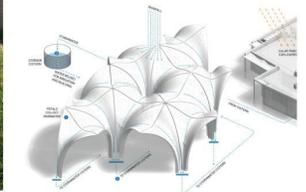

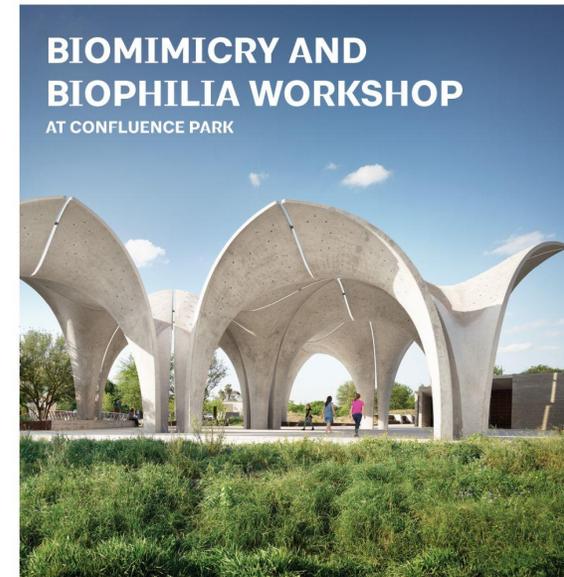

LOCATION:
Confluence Park

2022: THE GOOD(++). . . . THE BAD(--). . . .

++ 6 EDUCATIONAL EVENTS PRODUCED OR CO-PRODUCED: *See next slides.*

++ AWARDS TECH REVIEW: *Gathered 13 COTE colleagues to tech review 225 AIASF Awards submissions based on the AIA Common App criteria. Criteria matched AIACA for consistency.*

-- AWARDS JURY: *Awards did not match our Common App Tech Review outcome.*

++ AIASF COMMITTEE CONNECTIONS: *Presented Common App and Framework for Design Excellence to three AIASF Committees (Small Firm, Latinx In Arch, Historic Resources)*

++ GREENBUILD GATHER: *Co-Hosted 250 COTE party @ Greenbuild! Thanks Kira & EHDD++!!*

2023: THE BETTER! (GOALS):

++ EXPAND AIASF COTE: *EXPAND OUTREACH + MEMBERSHIP + LEADERSHIP + DIVERSITY*

++ AWARDS: *Guide AIASF on Jury Selection for better outcomes.*

++ EVENTS: *Broader collaboration | Return to hybrid events | Building Tours | Social Gathers*
