

# U.S. Department of Commerce Webinar

## ARCHITECTURE AND ENGINEERING Sectors: UAE & SAUDI ARABIA & QATAR

### Please Join US

We invite you to participate in a free webinar on August 4, 2015 to learn more about opportunities for architecture and engineering services in the Arabian Gulf countries.

Speakers will include individuals actually working in the countries to who will address the business climate and culture.

### Abu Dhabi UAE

Abu Dhabi has started the new Midfield Terminal airport expansion; it is also building new hotels and international museums on Al Maryah and Saadiyat Islands.

### Riyadh and Jeddah, Saudi Arabia

Saudi Arabia is already looking for U.S. capabilities in assisting in the design and development of 2.5 million residential units and multi-use compounds associated with the significant demand for housing.

### Opportunities in Doha, Qatar

Qatar is spending over \$250 billion on physical infrastructure and other developments over the next five years. Projects include the new Hamad International Airport (Phase II in planning stage), the New Doha Port Project (the world's largest greenfield port project) and new rail lines.

### Best Prospects:

- Master planning;
- Health care architecture; hospitality;
- Airports/other transportation infrastructure facilities;
- Architecture and Engineering services for mixed-use projects;
- Sports and entertainment; and
- Educational facilities
