 **Essential for the UNESCO-UIA's architectural education**, June 2, 2003

By **A Customer**

This review is from: Programming for Design: From Theory to Practice (Hardcover)

In July 2002, UIA agreed to promote their criteria on Architectural Education, worldwide. Among various criteria, we can clearly find necessity of teaching the architectural programming in school. With understanding this situation, I can recommend this as the BEST TEXT BOOK among others in this field, compulsory for students and educator.

REAL NAME

This review is from: Programming for Design: From Theory to Practice (Hardcover)

Edith Cherry provides a very comprehensive overview of a subject that tends to be overlooked or neglected by many individuals in the architectural field. This is a must read for every architectural office regardless of office size or scale of work. Understanding and implementing Programming is an essential component in the architectural process that can not be overlooked.
